Testimonial

"I've been in the sprinkler system installation and repair and landscaping business for less than two years. I tried advertising with other advertising firms, but that was a mistake; I won't deal with either one of them any more. I had another company do my first Web site, and they did a terrible job.

Then my SuperMedia representative came in and took me by the hand and set up a really nice **Web site** for me. I also now have an **Identity Bundle® on Superpages.com®**, and SuperMedia did a bang up job with it, too. **About 20-30% of all the calls I get are a result of my Superpages.com advertising program**. Since July of last year, I've received over 48,000 impressions and 265 clicks to my Web site.

I just picked up a really nice $10,000 job from my Superpages.com program. It was a big residential landscaping and sprinkler job for a man who bought his house two months ago.

SuperMedia has been great to work with, and my Media Consultant has bent over backwards for me. I can't tell you how much he has helped me. Out of all the reps I have dealt with, he is the only one who has done so. All the rest just take my money and I never hear from them again. I recommend SuperMedia to everyone who asks who developed my Web site."
